DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

A: claims 17 and 21 drawn to a liquid crystal display device according to Fig. 1A. The specifics being that a short-circuiting bar is placed at a smaller of the distances of the first and second diodes placed from the open ends.

(Note: If species A is selected, the method claims 25 and 29 will be examined also along with claims 17 and 21).

B: claims 18 and 22 drawn to a liquid crystal display device according to Fig. 1B. The specifics being that a short-circuiting bar is placed at the largest of the distances of the first and second diodes placed from the open ends.

(Note: If species B is selected, the method claims 26 and 30 will be examined also along with claims 18 and 22).

C: claims 19 and 23 drawn to a liquid crystal display device according to Fig. 6A. The specifics being that test signal lines are connected to each of the data signal lines and a short circuit bar is placed at a smaller of the distances of the first and second diodes placed from the open ends.

(Note: If species C is selected, the method claims 27 and 31 will be examined also along with claims 19 and 23).

D: claims 20 and 24 drawn to a liquid crystal display device according to Fig. 6B. The specifics being that test signal lines are connected to each of the

data signal lines and a short circuit bar is placed at a portion nearer to the data signal lines than the first and second diodes.

(Note: If species D is selected, the method claims 28 and 32 will be examined also along with claims 20 and 24).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prasad R Akkapeddi whose telephone number is 703-305-4767. The examiner can normally be reached on 7:00AM to 5:30PM M-Th.
